Comments:

Graded Agency:

The U.S. Nuclear Regulatory Commission (NRC) supports its mission and operations through Federal acquisitions with small businesses and is committed to achieving its small business goals. The agency's Small Business Program has implemented an active compliance, technical assistance, and outreach program designed to maximize prime and subcontract opportunities for small businesses. The NRC Small Business Program continued to enhance and refine the comprehensive support it provides to agency buyers as well as increase its engagement between acquisition staff, regional buyers, and the small business marketplace.

As a result, the agency exceeded all five of its small business prime contract goals. This accomplishment included the NRC more than quadrupling its small disadvantaged business goal and more than doubling the goal for women, service-disabled veterans, and companies located in historically underutilized business zones. The interdependency and collaboration among the Small Business Program, agency acquisition staff, and program offices on acquisition planning and market research activities was critical to NRC's achievements. Moving forward, the Small Business Program plans to enhance performance where possible through leveraging innovative technologies that foster collaboration, launch a virtual series of small business events designed to educate the business community on how to conduct business with the agency and the resources available to Federal contractors, implement strategic corrective actions to address subcontracting performance, continue to provide support to companies impacted by COVID-19, and remove barriers associated with participating in the agency's acquisition program.
